- Call for Contributions and Participation -

2nd D-Grid Monitoring Workshop

29. - 30. November 14:00 Uhr bis Freitag 12:00 Uhr
@ Leibniz-Rechenzentrum Garching bei München

After the success of the first workshop in Wuppertal, the second workshop about monitoring in D-Grid should:
- strengthen the ties between the different individuals and working groups which do monitoring in D-Grid
- discuss the possibility of a common interface for the different systems, pursue its development and installation
- coordinate the integration of the communities systems into the integration project DGI

Accompanying questions are:

- is it possible to find a common interface for the communication of the communities' metering and visualisation components in D-Grid?
- which data should be exchanged?

Further topics in this scope:

- description languages: integration versus diversity
- translators
- portable sensor components for metering
- portable interfaces for visualization
- data delivery methods
- persistent caching of data and databases
- integrated monitoring architectures

The workshop is intented for members of all D-Grid communities explicitely concerned with monitoring systems.
We will have discussion rounds and presentations. To ease the planing of the agenda, please send a short abstract about your presentation or intended discussion topic to timo.baur@lrz-muenchen.de

Organizers:
========

Timo Baur, Leibniz Rechenzentrum München (timo.baur@lrz-muenchen.de)
Jan Wiebelitz, RRZN, Leibniz Universität Hannover (wiebelitz@rrzn.uni-hannover.de)
Dr. Torsten Harenberg, Bergische Universität Wuppertal (harenberg@physik.uni-wuppertal.de)

Important dates:
==========

Abstract	15 November 2007
Workshop	29-30 November 2007

Please send your submissions as a short email to Timo Baur [timo.baur@lrz-muenchen.de].
